

CRM System — Sprint 1 MoSCoW Prioritization

Customer Relationship Management (CRM) System — COMP50074 Professional Practice and Project Management

Group Members: Waleed Ahmed (CB016480) · Himaz Liyakath (CB016537) · Inshiraff Thaseem (CB016909) · Aadhil Fazal (CB013336)

1. Purpose

This document reprioritizes the CRM product backlog using the MoSCoW method (Must have, Should have, Could have, Won't have). As part of this, the backlog was cleaned up: items that were not genuine standalone features were folded into the feature they support, duplicate/overlapping entries were merged, and one item was reclassified as a Non-Functional Requirement rather than a feature. Remaining features are then ordered by dependency, so prerequisite items appear before the features that rely on them.

2. Backlog Clean-Up Summary

The following changes were made to the original 22-item backlog before prioritizing:

- Reclassified as Non-Functional Requirement: "Role-Based Access Control" (PB-22) describes a security constraint on the system, not a user-facing feature — moved to Section 4.
- Not a standalone feature: "Track Lead Status through the Sales Pipeline" (PB-06) — this was flagged in the original draft as "not a feature." Status tracking is inherent behavior of a Deal record, so it has been folded into "Create and Manage Deals" (F06).
- Merged — same action, different trigger: "Assign Leads to Team Members" (PB-03) and "Reassign Leads to Another Sales Representative" (PB-12) are the same underlying capability (assigning a lead to a rep) and have been combined into F05.
- Merged — write/read pair: "Log Customer Interactions" (PB-04) and "View Customer Communication History" (PB-11) are two views of the same data (recording an interaction, and viewing the resulting history) and have been combined into F07.
- Merged — Deal attributes, not separate features: "Record Budget Estimates" (PB-08) and "Record Project Timeline / Expected Delivery Date" (PB-09) are fields captured on a Deal, not independent features. Folded into F06.
- Merged — reporting layer: The four dashboard views (PB-13, 14, 15, 16) and "Generate Management Reports" (PB-17) all read from the same underlying data and are natural components of one Dashboard & Reports feature (F10).
- Merged — same capability, different label: "Search Companies, Contacts and Leads" (PB-18) and "Filter Leads and Deals by Status" (PB-19) are both query/lookup utilities and have been combined into F11.
- Duplicate list entries: PB-20 and PB-21 in the original draft repeat PB-01 and PB-02 — removed as duplicates.

3. Functional Features — MoSCoW, Ordered by Prerequisite

Features are listed in the order they should be built: each depends only on features above it in the list. "Depends on" shows the prerequisite feature(s) that must exist first.

ID	Feature	Priority	Depends On	Source ID(s)
F01	User Login	Must	None (foundation)	PB-01
F02	Manage Users and Roles	Must	F01	PB-02
F03	Store Client Details (Companies & Contacts)	Must	F01	PB-03

ID	Feature	Priority	Depends On	Source ID(s)
F04	Create and Manage Leads	Must	F03	PB-05
F05	Assign / Reassign Leads to Team Members	Must	F02, F04	PB-04, PB-12
F06	Create and Manage Deals (incl. Budget Estimates, Project Timeline, and Lead/Deal Status through the Sales Pipeline)	Must	F04	PB-06, PB-08, PB-09, PB-10
F07	Log and View Customer Interactions (Calls, Meetings, Notes & Communication History)	Must	F04	PB-04*, PB-11
F08	Store Customer Requirements	Must	F04	PB-05*
F09	Schedule Follow-ups and Reminders	Must	F04, F06	PB-07/PB-14
F10	Dashboard & Reports (Sales Pipeline Summary, Lead Conversion Statistics, Upcoming Follow-ups, Active Leads Summary, Management Reports)	Should	F04, F06, F09	PB-13, PB-14, PB-15, PB-16, PB-17
F11	Search & Filter (Companies, Contacts, Leads and Deals)	Could	F03, F04, F06	PB-18, PB-19

Sprint 1 recommendation

F01–F09 (all Must haves) form a complete, coherent core: login, users/roles, client and lead data, deal management, interaction logging, requirements, and follow-ups. This is the realistic Sprint 1 scope. F10 (Dashboard & Reports) and F11 (Search & Filter) depend on this data existing first and read naturally as later-sprint work — include them in the backlog now for planning visibility, but they are not required to demo a working core CRM at the end of Sprint 1.

4. Non-Functional Requirements

Requirements that describe a quality or constraint on the system rather than a discrete user-facing feature.

ID	Requirement	Priority	Depends On	Notes	Source ID
N01	Role-Based Access Control	Must	F02	Security - controls what each role can see/do; not a user-facing feature in itself.	PB-22

5. Traceability — Original Backlog to Revised Backlog

Maps every original ID from the finalized product backlog to where it ended up below, so nothing is lost.

Original ID	Original Feature	Mapped To
PB-01	User Login	F01
PB-02	Manage Users and Roles	F02
PB-03	Store Client Details	F03
PB-04	Log Customer Interactions	F05 (assignment ref.) / F07
PB-05	Create and Manage Leads	F04 / F08

Original ID	Original Feature	Mapped To
PB-06	Track Lead Status through Sales Pipeline	Folded into F06 (flagged in source doc as "not a feature")
PB-07	Schedule Follow-ups and Reminders	F09
PB-08	Record Budget Estimates	Folded into F06
PB-09	Record Project Timeline / Expected Delivery Date	Folded into F06
PB-10	Create and Manage Deals	F06
PB-11	View Customer Communication History	F07
PB-12	Reassign Leads to Another Sales Representative	F05
PB-13	View Sales Pipeline Summary	F10
PB-14	View Lead Conversion Statistics	F10
PB-15	View Upcoming Follow-ups	F10
PB-16	View Active Leads Summary	F10
PB-17	Generate Management Reports	F10
PB-18	Search Companies, Contacts and Leads	F11
PB-19	Filter Leads and Deals by Status	F11
PB-20	User Login (duplicate entry in original draft list)	F01
PB-21	Manage Users and Roles (duplicate entry)	F02
PB-22	Role-Based Access Control	N01 (moved to Non-Functional Requirements)
